

GENTLEMEN,I ENJOY the fact satellite radio provides variety and quality that are not available elsewhere. I do choose to pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. Freedom of choice is a great thing.

Satellite radio just became that much better than commercial radio...the fact that I can, If I choose, listen to the weather and traffic as a convenience without listening to all the extraneous junk of commercial radio is a plus.

I really didn't think there was a lock on these bits of information.

tell me if i am wrong
